Rabbit polyclonal IgG
0.2 µg/µl, store at 4 °C

BACKGROUND

TOSO is a cell surface protein that is expressed in lymphoid cells. Its expression is enhanced after cell-specific activation processes in T cells. Toso blocks apoptosis mediated by members of TNF family and is capable of inhibiting T cell self-killing induced by TCR activation.

SPECIFICITY

This antibody specifically recognizes TOSO of human origin.

The antibody can be used in Western blotting, immunoprecipitation and immunostaining.

IMMUNOGEN

A synthetic peptide derived from C-terminus of human TOSO protein.

STORAGE

This antibody is stable for 12 months when stored at 2-8°C.
